

Electricity key for washing and drying

Use this card (different colours for different floors) for washing and drying.

Insert the washing key in the slot of the electricity counter.

On the display you will see two numbers, one for the dryer and the other for the washing machine

One unit is 60 seconds.

One hour costs CHF 1.20 (Swiss average)

At the end of your stay, add both numbers for the electricity costs. Divide the sum by 60 and multiply by 1.20.

This is the amount you have to pay for your washing. You can pay the amount at your checkout or leave it on the desk with your key, when you have already left.
